

Structural Policy Challenges in Slovakia

Discussion paper 1/2010¹

Martin Filko², Štefan Kišš³, Ľudovít Ódor⁴, Matej Šiškovič⁵

Abstract

The discussion paper presents possible approaches for measuring the quality of life together with their strengths and weaknesses. We identify 10 outcome indicators, which could help not only to set targets, but also as a quantitative benchmark for structural policy evaluation in Slovakia. In addition to that we present several case studies with best practices mainly from EU countries. Based on these we formulate 33 structural policy recommendations.

JEL classification: E01, H50, O11, O43.

Key words: Structural Policies, Outcome Indicators, Well-being, Economic Growth.
