

Quarterly fiscal database 1996-2006 (for analytical purposes)

Occasional paper 2/2010 NBS¹

Mária Marčanová, Ľudovít Ódor²

Abstract

The paper presents a complex quarterly database of general government revenues and expenditures in the period of 1996-2006, not being available in Slovakia till this time. It's being based according to economic budgetary classification, while maintaining main principles of the ESA95 methodology and so remaining internationally comparable. Further application allows a quantitative research of different aspects of fiscal policy: the size of multipliers, effectiveness of fiscal measures or the structural deficit calculation. The data are applicable as well in complex models of Slovak economy to improve fiscal blocks. The database will be publicly available for analytical purposes at NBS webpage.

JEL classification: "H 71, H 72, H 00"

Keywords:

"revenues, expenditures, general government, budgetary classification, accrual methodology"
