As at the date effective date of that decision, the SPMC shall prepare an opening balance sheet of the dissolving supplementary pension fund. After a decision of Národná banka Slovenska to grant prior approval under Article 26(1)(l) has concluded effect, the SPMC shall conclude its management of the supplementary pension fund's assets by following the procedure set out in paragraph (4). In order to protect the rights of participants and beneficiaries, Národná banka Slovenska may require this procedure to be carried out by a depository or another SPMC.

(4) SPMCs or person specified under paragraph (3) shall within six months after the occurrence of events under paragraph (3):

(6) The obligation to comply with risk-spreading limits under this Act does not apply to the sale of assets of a dissolving supplementary pension fund under paragraph (4).

(7) Information on the progress of the procedure under paragraph (4) shall be provided to Národná banka Slovenska at least once each calendar month by the SPMC or person specified under paragraph (3).

**Investment of supplementary pension funds' assets
and risk-spreading rules for supplementary pension funds**
Article 53

(1) SPMCs shall invest the assets of their supplementary pension funds in accordance with prudential business rules, pursuant to paragraphs (2) to (6) only in the types of assets mentioned in Article 53a, and in compliance with risk-spreading rules for supplementary pension funds under Article 53b.

(2) SPMCs shall invest the assets of supplementary pension funds in the best interests of participants and beneficiaries. In the case of a potential conflict of interests, the SPMC shall ensure that the assets of the supplementary pension fund are invested in the best interests of participants and beneficiaries.

(3) SPMCs shall invest the assets of supplementary pension funds predominantly in assets admitted to trading on a regulated market. The investment of a supplementary pension fund's assets in assets which are not admitted to trading on a regulated market must be kept to prudent levels; prior to making such an investment, the SPMC shall assess all the risks associated with it and its potential impact on the asset returns of the supplementary pension fund. SPMCs shall set internal limits for risks associated with the investment of supplementary pension funds' assets, continuously monitor compliance with these limits, and take measures to counter any risk of these limits being exceeded.

(4) SPMCs shall appropriately spread the investment of supplementary pension funds' assets so as to prevent over-reliance on a given asset or issuer, excessive risk exposure to any asset class, issuer or group of persons, and the accumulation of risk in the overall portfolio of a supplementary pension fund. SPMCs shall not allow a supplementary pension fund's portfolio to have an excessive concentration of exposure to the same issuer, or group of issuers, whether through direct investment or through indirect investment via other instruments or products whose underlying are exposed to such issuer or group of issuers. If investments in certain asset classes entail a high level of risk, whether by virtue of the nature of the asset or the quality of the issuer, they must be kept to prudent levels.

(5) SPMCs may not circumvent risk-spreading limits under Article 53b in such a way that in addition to investing assets of a supplementary pension fund in transferable securities and money market instruments, bank deposits pursuant to Article 53a(1)(b) and/or derivatives pursuant to Article 53a(2), they concurrently invest assets of the fund in financial instruments mentioned in Article 53b(9) or other instruments whose underlying are exposed to the same issuer, the same bank or the same counterparty, or whose returns are derived from assets included in the supplementary pension fund. The investment of assets of a supplementary pension fund in other instruments referred to in the first sentence must be taken into account by the SPMC for the purposes of fulfilling the obligation under paragraph (4).

(6) When selling or buying transferable securities or money market instruments from or for the portfolio of a supplementary pension fund and when entering into a derivative transaction, SPMCs shall sell or buy these securities and money market instruments, and shall enter into the derivative transaction, for the best price obtainable in the financial market in favour of the fund's asset portfolio.

(7) SPMCs may not sell, or otherwise dispose of, transferable securities or money market instruments from the portfolio of a supplementary pension fund under a contract stipulating delivery of the securities as a condition precedent for payment of the purchase price.

(8) SPMCs may not buy, or otherwise acquire, transferable securities or money market instruments for the portfolio of a supplementary pension fund under a contract stipulating payment for the securities as a condition precedent for their delivery, nor may they provide an advance for the acquisition thereof.

(9) SPMCs, in investing assets of a supplementary pension fund, may not make an uncovered sale of financial instruments. For this purpose, an 'uncovered sale' means any transaction in which the SPMC exposes a supplementary pension fund to the risk that it will have to buy the financial instrument at a price higher than the price agreed upon in the transaction and therefore that the fund will make a loss or be exposed to the risk of not being able to deliver the financial instrument that by entering into the transaction it has undertaken to deliver.

(10) The definition of an uncovered sale in paragraph (9) includes short-selling. Short-selling of equities or debt instruments means any sale of equities or debt instruments not held in the supplementary pension fund's portfolio when the sale agreement is concluded; this includes sales where the SPMC borrowed the equities or debt instruments, or concluded an agreement to borrow them for the fund's asset portfolio, in order to deliver them when the transaction is settled. Short-selling does not include:

- (a) the sale of assets from a supplementary pension fund's portfolio under a repurchase agreement concluded between the SPMC and a counterparty, where one party undertakes to sell the securities to the other party at an agreed price and the other party agrees to sell back the securities to that party at a different agreed price;
- (b) a transfer of securities under a securities lending agreement; or
- (c) the conclusion of a derivative contract under which securities are to be sold at an agreed price on a specified date in the future only at financial settlement.

(11) SPMCs shall, at the request of Národná banka Slovenska, provide credible evidence of the fulfilment of the obligations laid down in paragraphs (1) to (9); if an SPMC fails to comply with such request, it is deemed to have breached these obligations.

(12) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, providing for how the obligations laid down in paragraphs (1) to (9) and paragraph (11) are to be fulfilled and how compliance with these obligations is to be demonstrated.

Article 53a

Laws of the Slovak Republic, stipulating how liabilities related to financial derivatives in the asset portfolios of supplementary pension funds may be covered.

(2) If the use of techniques and instruments mentioned in paragraph (1) includes the use of derivatives, the limits laid down by the rules of the supplementary pension fund, referred to in paragraph (1), must be consistent with risk-spreading rules pursuant to this Act and these derivatives must meet the criteria laid down by this Act and the requirements for counterparties in derivative transactions pursuant to Article 53f(2).

(3) Techniques and instruments referred to in paragraphs (1) and (2) may be used only to such an extent that does not change how the assets of the supplementary pension fund are invested or the investment policy and investment objective set out in the fund's rules and does not attract a substantial risk additional to that envisioned in the risk policy; the use of such techniques and instruments must be consistent with the best interests of participants and beneficiaries.

(4) All commissions and fees that an SPMC receives in relation to the use of techniques and instruments mentioned in paragraph (1), adjusted to include the amount of direct and indirect operating costs, shall be added to the assets of the supplementary pension fund.

(7) Národná banka Slovenska shall issue a decree, to be published in the Collection of Laws of the Slovak Republic, providing for:

- (a) the criteria that the techniques and instruments mentioned in paragraph (1) must meet;

(2) Once the period mentioned in paragraph (1) has expired, the SPMC may exceed the limits and restrictions under Articles 53a to 53f only upon the exercise of pre-emptive subscription rights arising from securities or money market instruments included in the assets of the supplementary pension fund, or when supplementary pension funds are merged.

(3) If any of the limits or restrictions mentioned in Articles 53a to 53f are exceeded for reasons beyond the control of the SPMC, or owing to the exercise of pre-emptive rights under paragraph (2), the SPMC shall without undue delay notify Národná banka Slovenska of this fact and take measures to conform with the limits and restrictions under this Act. This is without prejudice to the obligation of the SPMC to proceed in accordance with the first sentence also in the case that the limits and restrictions under this Act are breached as a consequence of wilful negligence. Transactions made in order to bring the composition of the supplementary pension fund's assets into compliance with the limits and restrictions under this Act shall take precedence over other transactions. The obligation to take measures under the first and second sentences shall not expire upon the imposition of a penalty under this Act.

(4) Národná banka Slovenska may set a time limit for an SPMC to bring the composition of a supplementary pension fund's assets into compliance with the limits and restrictions under this Act. Národná banka Slovenska may at the request of the SPMC extend the time limit mentioned in the first sentence, on one more occasions, provided that the request is submitted no later than ten working days before the end of the period granted for bringing the composition of the fund's assets into compliance with this Act and that such extension is justified in the interest of protecting participants and beneficiaries.

Risk management

Article 55

- (1) SPMCs, in managing the assets of supplementary pension funds, shall:
- (a) introduce and maintain a risk management system enabling:
1. timely identification, continuous measurement and management of all significant risks to which supplementary pension funds are or could be exposed;
 2. continuous monitoring and measurement of position risk and the impact of positions on the global exposure related to the investment of funds' assets;
 3. continuous monitoring and measurement of the global exposure related to derivatives

mentioned in Article 53f(4) and (5), and the ensuring of compliance with its limit;

4. proper performance of the risk management function pursuant to Article 29a;

(b) use procedures for the accurate and reliable valuation of OTC financial derivatives.

(2) For the purposes of this Act, a distinction shall be made between:

- (a) credit risk, being the risk that a supplementary pension fund incurs a loss due to the failure of a debtor or other contracting party to meet their obligations; credit risk includes counterparty risk, meaning the risk that the fund incurs a loss because the counterparty in a transaction fails to meet its obligations before final settlement of the transaction;
- (b) market risk, being the risk that a supplementary pension fund incurs a loss due to movements in the market value of the fund's asset positions caused by changes in variable market factors, such as interest rates, exchange rates, equity prices, commodity prices and the creditworthiness of issuers;
- (c) operational risk, being the risk that a supplementary pension fund incurs a loss due to inappropriate internal procedures and failures associated with persons and systems of the SPMC or to external events; operational risk includes legal and documentation risks and risks related to trading, settlement and valuation procedures conducted on behalf of the supplementary pension fund.

(3) In order to meet the obligations laid down in paragraph (1), SPMCs shall introduce, apply and maintain an appropriate and documented risk management policy that identifies risks to which supplementary pension funds under its management are or could be exposed.

(4) Risk management policies shall include procedures necessary to ensure that SPMCs can assess the exposure of each supplementary pension fund under their management to the risks mentioned in paragraph (2) as well as to all other significant risks. For the purposes of risk management, 'significant risk' means any risk that may with reasonable probability be expected to affect the interests of participants and beneficiaries.

(11) The procedures, instruments and measures referred to paragraph (10) must be suitable with regard to the nature, scale and complexity of the activities of the SPMC and the supplementary pension funds under its management, and they must be consistent with the risk profiles of these supplementary pension funds.

- (12) For the purposes of meeting the obligations under paragraph (10), SPMCs shall:
- (a) introduce such risk management measures and procedures that are necessary to ensure that risks associated portfolio positions and their effect on the overall risk profile are measured precisely on the basis of sound and reliable data and that the risk measurement measures and procedures are duly documented;
- (b) if they measure market risk, or calculate global risk related to derivatives pursuant to Article 53f(4) and (5), by the method mentioned in Article 55a(1)(b), perform back-testing in order to examine the functionality of risk measurement measures, with this testing to include forecasts and estimates based on relevant models;
- (c) if they measure market risk, or calculate global risk related to derivatives pursuant to Article 53f(4) and (5), by the method mentioned in Article 55a(1)(b), perform periodical stress testing and analyses of stress scenarios in order to take account of market risks that could adversely affect supplementary pension funds under their management;
- (d) introduce and apply a documented system of internal limits for measures used in the management and checking of risks relevant to each supplementary pension fund, taking into account all the risks that could be significant for each fund and ensuring compliance with the respective fund's risk profile;
- (e) ensure that for each supplementary pension fund the current level of risks is consistent with the internal limit system mentioned in point (d);
- (f) introduce, apply and maintain suitable procedures which in response to an actual or expected breach of the internal limit system mentioned in point (d) will ensure timely remedial measures in the best interests and for the protection of participants and beneficiaries.
- (g) refrain from relying solely or mechanistically on credit ratings, issued by credit rating agencies,^{40b} for assessing the creditworthiness of a supplementary pension fund's assets.

(13) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, which:

4. qualitative and quantitative requirements for stress testing pursuant to point three.

Article 55a

Calculation of global exposure related to financial derivatives

(1) A supplementary pension fund's global exposure related to derivatives mentioned in Article 53f(4) and (5) shall be calculated by the SPMC as:

- (a) the incremental exposure and leverage generated by using derivatives, including securities embedding a derivative pursuant to Article 53f(6), which, under Article 53f(4), may not exceed the fund's net asset value and, under Article 53f(5) may not exceed 20% of the fund's net asset value; or
- (b) the market risk exposure of the fund's asset portfolio.

(2) The calculation of a supplementary pension fund's global exposure related to derivatives shall be calculated by the SPMCs at least once every working day.

(3) Where an SPMC calculates global exposure as the exposure mentioned in paragraph (1)(a), it shall do so using the commitment approach pursuant to Article 55b. Where an SPMC calculates global exposure as the exposure mentioned in paragraph (1)(b), it shall do so using the Value-at-Risk ('VaR') approach pursuant to Article 55c; 'VaR' shall be understood to mean the highest expected loss over a given period of time at a given confidence level.

(4) SPMCs shall ensure that the method selected for measuring global exposure pursuant to paragraph (3) is appropriate for the given supplementary pension fund, and in doing so they shall take into account the investment strategy of the fund, the type and complexity of the derivatives included in the fund's asset portfolio, and the share of these derivatives in the fund's assets.

(5) If as part of its management of a supplementary pension fund, an SPMC uses, pursuant to Article 53g, techniques and instruments that include a securities repurchase agreement, securities purchase and resale agreement or securities lending agreement in order to increase leverage or the level of market risk exposure, the company shall take these transactions into account when calculating global exposure pursuant to Article 53f(4) and (5).

Article 55b

Commitment approach

(1) Where an SPMC uses the commitment approach to calculate a supplementary pension fund's global exposure pursuant to Article 53f(4) and (5), it shall apply this approach to all positions in derivatives, including securities embedding derivatives under Article 53f(6), regardless of whether such positions are taken as part of the fund's investment policy for the purposes of risk mitigation or for the purposes of efficient portfolio management under Article 53g.

(2) When using the commitment approach to calculate a supplementary pension fund's global exposure pursuant to Article 53f(4) and (5), the SPMC shall convert each derivative position into the market value of the equivalent position in the respective underlying.

(3) If the derivative investments of a supplementary pension fund are not generating any incremental exposure for the fund, the SPMC is not required to include positions in the respective underlyings in the commitment.

(4) When calculating the global exposure of a supplementary pension fund, SPMCs may take into consideration hedging and netting arrangements, provided that these arrangements take account of clear and significant risks and result in an appreciable reduction in exposure.

(5) Where an SPMC uses the commitment approach to calculate global risk exposure, the calculation need not include liabilities in the form of loans and credits received pursuant to Article 53a(5) and 53b(11).

(6) If, for the purpose of efficient portfolio management, the rules of a supplementary pension fund allow techniques and instruments relating to transferable securities and money market instruments to be used to the credit or debit of the fund and the use of these techniques and instruments generates additional leverage through the reinvestment of collateral, the SPMC shall take account of the use of these techniques and instruments when calculating global risk using the commitment approach.

(7) Národná banka Slovenska shall issue a decree, to be published in the Collection of Laws of the Slovak Republic, providing for:

- (a) methodologies for the conversion of derivative positions pursuant to paragraph (2) for different types of position;
- (b) criteria for determining derivatives that do not generate incremental exposure for the portfolio of a supplementary pension fund pursuant to paragraph (3);
- (c) how the hedging and netting arrangements referred to in paragraph (4) are to be taken into account when calculating global exposure using the commitment approach;
- (d) how the techniques and instruments mentioned in paragraph (6) are to be taken into account when using the commitment approach to calculate global exposure.

(8) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, providing for the calculation of global exposure using the commitment approach.

Article 55c **Value-at-Risk approach**

(1) Where an SPMC uses the VaR approach to calculate global exposure pursuant to Article 53f(4) and (5), it shall apply this approach to all positions in the fund's asset portfolio.

(2) When using the VaR approach, SPMCs shall, pursuant to Article 55(12)(d), set the maximum VaR in accordance with the defined risk profile of the respective supplementary

pension fund.

(3) When using the VaR approach to calculate global exposure, SPMCs shall use either the relative VaR approach or the absolute VaR approach, whichever is appropriate for the risk profile and investment strategy of the respective supplementary pension fund.

(4) SPMCs are required, at the request of Národná banka Slovenska, to demonstrate that the approach selected under paragraph (3) is appropriate for the respective supplementary pension fund. The company's decision to use the given approach, and the assumptions and grounds on which it based that decision, must be properly documented.

(5) The approach selected under paragraph (3) shall be used on an ongoing basis.

(6) Národná banka Slovenska shall issue a decree, to be published in the Collection of Laws of the Slovak Republic, stipulating:

- (a) how to calculate global exposure using the relative VaR approach;
- (b) how to calculate global exposure using the absolute VaR approach;
- (c) quantitative and qualitative requirements for the VaR approach;
- (d) the maximum limit that may not be exceeded when using the absolute VaR approach.

(7) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, providing for the calculation of global exposure using the VaR approach.

Article 55d Counterparty risk

(1) SPMCs shall ensure that counterparty risk arising from OTC financial derivatives does not exceed the limits laid down in Article 53b.

(2) When calculating counterparty risk exposure pursuant to Article 53b(7), SPMCs shall use the positive mark to market value of the OTC financial derivative contracts with the counterparty.

(3) When calculating counterparty risk exposure in the portfolio of a supplementary pension fund, SPMCs may net financial derivative positions with the same counterparty provided that they are able, on behalf of the fund, to enforce the netting agreement concluded with the counterparty. Positions netted with the same counterparty may not include positions other than those in OTC financial derivatives.

(4) SPMCs may reduce their counterparty risk exposure pursuant to Article 53b(7) through the receipt of collateral. Collateral received must be sufficiently liquid in order that it can be sold quickly at a price that is close to its pre-sale valuation.

(5) Where an SPMC passes collateral to a counterparty in an OTC financial derivative transaction conducted on behalf of a supplementary pension fund, this must be taken into account in calculating counterparty risk exposure pursuant to Article 53b(7). Collateral passed

may be taken into account on a net basis, provided that the SPMC is able, on behalf of the fund, to enforce the netting agreement concluded with the respective counterparty.

(6) SPMCs shall calculate the limits referred to in Article 53b using the commitment approach, on the basis of underlying asset positions arising from the use of financial derivatives.

(7) In the calculation of the limit referred to in Article 53b(8), SPMCs shall include all counterparty risk exposures in the portfolio of the supplementary pension fund which arise from OTC financial derivative transactions.

(8) Národná banka Slovenska shall issue a decree, to be published in the Collection of Laws of the Slovak Republic, stipulating:

- (a) requirements for collateral through which SPMCs may reduce counterparty risk;
- (b) rules for the calculation of limits referred to in Article 53b.

Article 55 Procedures for the valuation of OTC derivatives

(1) SPMCs shall ensure that the valuation of financial derivative positions in the asset portfolios of supplementary pension funds is verified; this is without prejudice to the provisions of Article 53a(2) and Article 53f(2) and (3). Verification pursuant to the first sentence shall consist of establishing whether the valuation of the financial derivative positions corresponds to the fair value, which does not rely only on market quotations by the counterparties of the OTC derivatives.

- (2) In the valuation of financial derivatives, the following criteria must be met:
- (a) the basis for the valuation is either a reliable up-to-date market value of the instrument, or, if such a value is not available, a pricing model using an adequate recognised methodology;
 - (b) verification of the valuation pursuant to paragraph (1) is carried out by one of the following:
 1. a third party which is independent from the counterparty of the OTC derivative, at an adequate frequency and in such a way that the SPMC is able to check it;
 2. a unit within the SPMC which is independent from the department in charge of managing the assets and which is adequately equipped for such purpose.

(3) For the purposes of paragraph (1), SPMCs shall introduce, apply and maintain measures and procedures to ensure appropriate, transparent and fair valuation of OTC financial derivative positions in the asset portfolios of supplementary pension funds. SPMCs shall duly document measures and procedures mentioned in the first sentence.

(4) SPMCs shall ensure that the fair value of OTC derivatives is established in an appropriate, accurate and independent way.

(5) Measures and procedures referred to in paragraph (3) must be appropriate and proportionate with regard to the nature and complexity of the respective OTC financial derivatives.

(6) Where measures and procedures relating to the valuation of OTC derivatives involve other parties, the SPMC shall comply with the obligations laid down Article 37(6) in regard to these other parties.
