Section 40

(1) The authorised person designated by the saver in an old-age pension scheme agreement shall, upon the death of the saver, become entitled to the payment of an amount corresponding to the current value of the deceased saver's personal pension account as at the date on which the PFMC learnt of the saver's death, with this amount to be reduced by the amount of undue mandatory contributions transferred on behalf of the deceased saver and requested back by the Social Insurance Agency and by the amount of legitimate expenditures of the PFMC incurred in relation to the payment of the amount in cash or its transfer to a non-euro area country, and increased by the amount of mandatory contributions that the Social Insurance Agency has still to transfer. Where a saver has not designated an authorised person in the old-age pension scheme agreement, or no such person exists, the assets in the saver's personal pension account shall become the subject of inheritance proceedings.

(2) An authorised person shall not become entitled to payment of the amount mentioned in paragraph 1 if a court has ruled that this person caused the death of the saver by an intentional criminal act.

(1) For the purposes of this act, the 'certificate' is an electronic confirmation, issued through the offer system, which shows the amount in euro that corresponds to the current value of a saver's personal pension account as at the date on which pension points were deducted from that account pursuant to paragraph 3. For savers who have specified the extent to which the amount corresponding to the current value of pension points credited from voluntary contributions shall be included in the amount stated on the certificate, the amount mentioned in the previous sentence shall be reduced by that amount which corresponds to the current value of pension points credited from voluntary contributions and which the saver did not include in the amount stated on the certificate.

(5) The amount stated on the certificate is also deemed to be that part of the current value of the saver's personal pension account, expressed in euro as at the entry date of the order, which the saver has decided to use for the offer pursuant to Section 46(4), Section 46a(4) and Section 46b(3).

For risk assessment in setting the amount of the pension stated in the offer under paragraph 1(a), the insurer shall use its own reliable assumptions made on the basis of available data; the calculated probability of mortality shall take into account future demographic trends, and the only personalised risk factor shall be the age of the future pension beneficiary.

Written notification of the entry of the old-age pension scheme agreement in the Register of Agreements shall be given without undue delay by the PFMC to the saver with whom it concluded the agreement.

The PFMC shall without undue delay notify in writing the natural person with whom it had concluded the old-age pension scheme agreement that the agreement has expired.

(8) The Social Insurance Agency shall without undue delay delete an old-age pension scheme agreement from the Register of Agreements if the agreement has expired, if the agreement should not have been entered in the Register of Agreements owing to a reason mentioned in paragraph 3 and this reason is discovered after the agreement's registration in Register of Agreements, or if a court decides that such contract is invalid or has not been established. If the Social Insurance Agency deletes an old-age pension scheme agreement from the Register of agreements, it shall without undue delay notify the PFMC that it has done so. The PFMC shall without undue delay notify in writing the natural person with whom it had concluded the old-age pension scheme agreement that the agreement has been deleted from the Register of Agreement.

(4) At the same time as transferring the pension funds' management, the PFMC that is to be dissolved shall relinquish to the transferee PFMC all documentation concerning such management and its other rights and obligations referred to in paragraph 1.

(5) Without undue delay after Národná banka Slovenska has granted the prior approval under Section 52(1)(h), the general meeting of the PFMC shall decide on the liquidation and dissolution of the PFMC, and the procedure mentioned in paragraph 1 shall take place.

After receiving a court's decision to make a bankruptcy order against it or to reject a bankruptcy petition on grounds of insufficient assets, a PFMC shall without undue delay send a copy of that decision to Národná banka Slovenska.

(5) After Národná banka Slovenska has received the notification mentioned in paragraph 3, it shall without undue delay take a decision to place all the pension funds of the PFMC in receivership. (6) A PFMC from which the management of pension funds is transferred to a transferee PFMC shall cease to maintain the personal pension account of the savers in these funds as of the date on which the pension funds' management is transferee.

(7) Where the management of a pension fund has been transferred to a transferee PFMC, the transferee PFMC shall open a new personal pension account under Sections 96 and 97 for each saver in the pension fund.

(8) Within 30 days after the management of pension funds has been transferred, the transferee PFMC shall notify the savers affected by the transfer of the pension funds' management that this transfer has taken place. The notification to the savers shall state in particular the company's business name and registered office address, information on the rules of the pension funds in question and on other related conditions of the old-age pension scheme. The transferee PFMC shall publish the notification mentioned in the previous sentence in a periodical publication with nationwide circulation, and shall first do so without undue delay after the pension funds' management has been transferred and again within 30 days after the first publication.

(9) At the same time as transferring the pension funds' management, the PFMC that managed the dissolving pension funds shall relinquish to the transferee PFMC all documentation concerning such management and its other rights and obligations.

(10) Upon the merger of the pension funds, the contract on depository activities shall expire. Without undue delay after the expiry of the contract on depository activities, the depository shall proceed in accordance with Section 100(9).

(11) The depository referred to in paragraph 10 shall notify the transferee PFMC of any measures that need to be taken to prevent the expiry of the contracts from causing damage or other injury.

(12) If the merger mentioned in paragraphs 1 to 11 involves the dissolution of a guaranteed bond pension fund and the merger takes place during the assessment period mentioned in Section 63d(3), the PFMC shall perform a fair-value valuation of the assets of the dissolving pension fund as at the day preceding the merger date and it shall replenish the assets in accordance with Section 63d by no later than the merger date; the last calendar month of the assessment period shall be the calendar month immediately preceding the calendar month in which the day mentioned

in paragraph 4 or (5) falls, while the first calendar month of the assessment period shall be the initial calendar month of the period that is the first in sequence.

Section 79a

(1) The provisions of paragraphs 2 to 11 apply to a merger that is not a merger under Section 79.

(2) A merger is a process in which the assets and liabilities of one or more dissolving pension funds are transferred to a successor pension fund; in this process either

- (a) the assets and liabilities of one or more dissolving pension funds are transferred to a successor pension fund established before the merger date, and as at the effective date of the merger the pension points of savers in the dissolving pension are credited to their personal pension account in the successor pension fund; or
- (b) the assets and liabilities of two or more dissolving pension funds are transferred to a successor pension fund established by the merger, and as at the effective date of the merger the pension points of savers in the dissolving pension are credited to their personal pension account in the successor pension fund.

(3) Only pension funds managed by the same PFMC may be merged. Only a pension fund mentioned in Section 72(5) may be the dissolving pension fund, while any pension fund may be the successor pension fund.

(4) Dissolving pension funds shall be dissolved as at the effective date of the merger; on that date, savers in these pension funds shall become savers in the successor pension fund.

(5) PFMCs that intend to merge pension funds in accordance with paragraph 1 shall inform savers of this fact before filing an application for prior approval under Section 52(4); within 30 days after the effective date of the decision of Národná banka Slovenska to grant this prior approval, the PFMC shall publish this decision and the prospectus of the successor pension fund and it shall inform the savers concerned in accordance with the procedure laid down in the rules of the pension fund for notifying savers of amendments to the rules and prospectus. The prospectus mentioned in the first sentence shall include a brief description of the investment policy and the principal risks in the successor pension fund.

(6) PFMCs shall set the date as at which they will calculate the final number of pension points in the dissolving pension fund and the net asset value of the dissolving pension fund.

(7) The effective date of a merger shall be set at no later than the third working day after the date mentioned in paragraph 6. The PFMC shall inform Národná banka Slovenska of the date set under paragraph 6 and the date set as the effective date of the merger, at least ten days in advance thereof.

(8) A merger of pension funds may not be annulled.

(9) If a merger of pension funds results in a situation where the composition of assets in the successor pension fund does not comply with the restrictions laid down in this Act or in the rules

of the successor pension fund, the PFMC shall bring the composition of assets into compliance with this Act by no later than six months after the effective date of the merger. In justified cases and in order to safeguard the assets of savers, Národná banka Slovenska may, at the request of the PFMC, extend the time limit mentioned in the first sentence.

(10) A guaranteed pension fund may not be merged to form a successor pension fund that is a non-guaranteed pension fund.

(11) Where a dissolving pension fund is a guaranteed pension fund and the merger under paragraphs 2 to 9 is to be carried out during the assessment period mentioned in Section 63d(4), the PFMC shall perform a fair-value valuation of the assets of the dissolving pension fund pursuant to Section 88b as at the date mentioned in paragraph 6, and as at that date it shall replenish the assets in accordance with Section 63d; the last calendar month of the assessment period shall be the calendar month immediately preceding the calendar month in which the day mentioned in paragraph 6 falls, while the first calendar month of the assessment period shall be the initial calendar month of the assessment period that is the first in sequence.

(2) PFMCs shall periodically check whether open-end funds, foreign collective investment undertakings or other foreign collective investment undertakings are complying with the profile and objectives of the investment policy specified in the rules of the open-end investment fund, foreign collective investment undertaking or other foreign collective investment undertaking, or in another similar document. For the purposes of this Act, securities acquired for the assets of a pension fund under paragraph 1(c) and (d), whose value is linked to the value of financial indices or other financial indices specified in paragraph 3(a), shall be treated as securities under paragraph 3(b).

Risk-spreading rules for pension funds

Section 82

(1) The value of securities or money market instruments mentioned in Section 81(1)(a) to (e), issued by the same issuer, may not constitute more than 3% of the net asset value of a pension fund. The value of transferable securities mentioned in Section 81(3)(b), issued by the same issuer,

may not constitute more than 10% of the net asset value of a pension fund, and in this regard the limit stated in the first sentence does not apply. For the purposes of the limits laid down in the first and second sentences, 'issuer' means an open-end investment fund or a foreign collective investment undertaking or other foreign collective investment undertaking.

(2) A pension fund's assets may not include more than 25% of the value of one issue of transferable securities or money market instruments.

(3) The sum of investments in i) securities issued by a single group of legal persons which are transferable securities, money market instruments, shares/units of open-end investment funds, and/or securities of foreign collective investment undertakings or other foreign collective investment undertakings, ii) deposits held with that group of legal persons, and iii) large exposures to that group arising from financial derivative transactions and hedging transactions may not constitute more than 20% of the net asset value of a pension fund. The group of legal persons mentioned in the first sentence mean legal persons that are part of a group for which a single set of consolidated financial statements are prepared in accordance with other legislation^{77a} or with international accounting standards.

(4) The value of transferable securities and money market instruments issued or guaranteed by one Member State or by the European Central Bank, the World Bank, the European Bank for Reconstruction and Development, or the International Monetary Fund, may not constitute more than 20% of the net asset value of the pension fund.

(5) If a PFMC complies with the risk-spreading rules for a pension fund laid down in this Act, Národná banka Slovenska shall, at the request of the PFMC, by approving the rules of the pension fund, determine that up to 50% of the net asset value of the pension fund may be invested in transferable securities and money market instruments issued or guaranteed by a Member State. These transferable securities and money market instruments shall be denominated in the same currency in which the current value of the pension point is expressed. The pension fund's assets mentioned in the first sentence shall include at least six issues of transferable securities or money market instruments and the value of one issue under the first sentence may not constitute more than 30% of the net asset value of the pension fund.

(6) Where a pension fund's assets include newly-issued transferable securities that have not been admitted to trading on a regulated market within the period mentioned in Section 81(1)(b), the PFMC shall sell these securities within a period of 180 days.

(7) Not more than 10% of the net asset value of a pension fund shall be accounted for by mortgage bonds⁷⁸ and covered bonds^{78a} issued by one bank, or by securities where they are issued by one foreign bank that has its registered office in a Member State and their par value and yields are covered by the bank's mortgage loan claims. The mortgage bonds and/or debt securities mentioned in the first sentence shall in total constitute not more than 50% of the net asset value of a pension fund.

(8) A pension fund's assets may not include more than:
(a) 10% of the sum of shares/units of open-end investment fund under Section 81(1)(c);

- (b) 10% of the sum of the par values of securities of one foreign collective investment undertaking or one other foreign collective investment undertaking.

(9) Not more than 20% of the net asset value of a pension fund shall be accounted for by securities mentioned in Section 81(1)(c) and (d).

(10) Securities mentioned in Section 81(3)(b) may constitute up to 50% of the net asset value of a non-guaranteed pension fund, provided that the investment policy laid down in the rules of the pension fund is not to replicate the composition of a financial index.

(11) Not more than 10% of the net asset value of a pension fund may be accounted for by funds held in current and deposit accounts with one bank, or one foreign operating in the Slovak Republic through its local branch, pursuant to Section 81(1)(f); this limit does not apply to funds in current accounts held with the depositary.

(12) PFMCs may not acquire either for themselves or the pension funds under their management:

- (a) more than 5% of the total par values of equities issued by one issuer; and
- (b) shares with voting rights that would allow the PFMC to exercise significant influence over the issuer's management; to calculate the proportion of voting rights attached to shares, the procedure under other legislation⁷⁹ shall be followed.

(13) Paragraphs 1 to 11 do not apply to shares/units of open-end investment funds and securities mentioned in Section 81(1)(c) and (d) and (3)(b) in the assets of the pension fund mentioned in Section 72(5), provided that the investment policy laid down in the rules of the pension fund is not to replicate the composition of a financial index.

Section 82a

Investment of assets of pension funds other than guaranteed bond pension funds

(1) Assets of pension funds other than guaranteed bond pension funds and non-guaranteed equity pension funds may include also:

- (a) shares/units of an open-end investment fund or securities of a foreign collective investment undertaking or other foreign collective investment undertaking, where their value is linked exclusively to the value of a precious metal or index of precious metals;
- (b) precious metal certificates.

(2) The sum of investments in securities and certificates mentioned in paragraph 1 and in derivatives mentioned in 82b(1) that have the same type of precious metal as an underlying instrument may not constitute more than 10% of the net asset value of a pension fund other than a guaranteed bond pension fund; the sum of investments in securities and certificates mentioned in paragraph 1 and in derivatives mentioned in Section 82b(1) that have any type of previous metal as their underlying instrument may not constitute more than 20% of the net asset value of a pension fund other than a guaranteed bond pension fund.

(3) The value of securities under paragraph 1 issued by the same issuer may not constitute more than 10% of the net asset value of a pension fund other than a guaranteed bond pension fund. No single issue of securities or instruments mentioned in paragraph 1 may constitute more than 10% of the net asset value of a pension fund other than a guaranteed bond pension fund.

(4) For the purposes of this Act, 'precious metal' means gold, silver, platinum or palladium.

Section 82b

(1) The assets of a pension fund other than a guaranteed bond pension fund may, in accordance with the profile and objectives of the investment policy specified in the rules of the pension fund and without regard to the restrictions laid down in Section 81(1)(g), (5)(c),(d) and (f), and (6), include derivatives which have as their only underlying instrument a precious metal or index of precious metals (hereinafter 'precious metal derivatives or derivatives linked to a precious metals index'), to which attaches a settlement right, and which are admitted to trading in a regulated market mentioned in Section 81(1)(a), to a commodities exchange under other legislation,^{79b} or another regulated commodities exchange incorporated in a Member State.

(2) Investment in precious metal derivatives or derivatives linked to a precious metal index may, in compliance with limits laid down in this Act, constitute part of the investment policy of a PFMC in a pension fund other than guaranteed bond pension fund. When investing in precious metal derivatives or derivatives linked to a precious metals index, the value of their underlying instruments shall be taken into account in the calculation of the limits under Section 82a.

(3) If a precious metal derivative or derivative linked to precious metals is embedded in a security included in the assets of a pension fund other than a guaranteed bond pension fund, that derivative shall be taken into account in regard to compliance with restrictions laid down in this Act.

(4) Pension funds other than guaranteed bond pension funds may not acquire a precious metal derivative or derivative linked to a precious metals index if delivery of the underlying instrument is required or if the counterparty has a right to request delivery of the underlying instrument.

(5) When managing the assets of a pension fund other than a guaranteed bond pension fund, PFMCs shall not conduct transactions in precious metal derivatives or in derivatives linked to a precious metals index if such transactions would have to be covered by assets that may not be acquired by pension funds other than guaranteed bond pension funds.

(6) Národná banka Slovenska may issue a decree laying down details about how to cover liabilities related to precious metal derivatives or derivatives linked to a precious metals index which are included in the assets of pension fund other than a guaranteed bond pension fund; the full text of such decree shall be published in the Collection of Laws of the Slovak Republic.

Section 82c

Global exposure to precious metal derivatives or derivatives linked to a precious metals index, and the calculation of that exposure

(1) For pension funds other than guaranteed bond pension funds, their global exposure to precious metal derivatives or derivatives linked to a precious metals index shall not exceed 15% of the fund's net asset value.

(2) The global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index shall be calculated by the PFMC as:

- (a) the incremental exposure and leverage generated by using precious metal derivatives or derivatives linked to a precious metals index, including securities mentioned in Section 82b(3) that embed a precious metal derivative or derivative linked to precious metals, which shall not exceed the ratio under paragraph 1; or
- (b) the market risk exposure of the pension fund.

(3) Where a PFMC calculates the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index in accordance with paragraph 2(a) it shall do so using the commitment approach. Where a PFMC calculates the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index in accordance with paragraph 2(b) it shall do so using the Value-at-Risk ('VaR') approach; for the purposes of this Act, 'VaR' means the highest expected loss over a given period of time at a given confidence level.

(4) PFMCs shall ensure that the method selected for measuring the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index is appropriate for the given type of pension fund, and in doing so shall take into account the investment policy of the given pension fund and the type and complexity of the precious metal derivatives or derivatives linked to a precious metals index included in the assets of the pension fund, as well as their share in the fund's assets.

(5) When managing the assets of pension funds other than guaranteed bond pension funds, PFMCs may use techniques and instruments involving repurchase transactions or securities lending, provided that they do so for the purposes of efficient portfolio management and under the conditions and in compliance with the limits laid down in the rules of the respective pension fund; in this regard the provision of Section 84(5) does not apply. Where PFMCs, when managing pension funds other than guaranteed bond pension funds, use techniques and procedures mentioned in the first sentence with the objective of increasing the leverage or market risk exposure of the pension fund, they shall take these operations into account when calculating the fund's global exposure to precious metal derivatives or derivatives linked to a precious metal index.

Section 82d

Commitment approach

(1) Where a PFMC uses the commitment approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index, it shall apply this approach to all positions in any such derivatives, including securities embedding a precious metal derivative or derivative linked to a precious metals index, regardless of whether such positions are taken as part of the fund's investment policy for the purposes of risk mitigation or efficient portfolio management.

(2) When using the commitment approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index, the PFMC shall convert each position in such derivative into the market value of the equivalent position in the underlying asset.

(3) Where a pension fund other than a guaranteed bond pension fund has a position in a precious metal derivative or derivative linked to a precious metals index which does not generate any incremental exposure for the fund, the PFMC is not required to include positions in the respective underlyings in the commitment.

(4) When calculating the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index, PFMCs may take into consideration hedging and netting arrangements, provided that these arrangements take account of clear and significant risks and result in an appreciable reduction in exposure.

(5) If, for the purpose of efficient portfolio management, a pension fund other than a guaranteed bond pension fund is authorised under its rules to use techniques and instruments mentioned in Section 82c(5) relating to transferable securities and money market instruments, to the credit or debit of its portfolio, and in using these techniques and instruments it generates additional leverage through the reinvestment of collateral, the PFMC shall take the use of these techniques and instruments into account when using the commitment approach to calculate the fund's global exposure to precious metal derivatives or derivatives linked to a precious metals index .

(6) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, stipulating:

- (a) methodologies for the conversion of positions in precious metal derivatives or derivatives linked to a precious metals index pursuant to paragraph 2 for different types of such derivatives;
- (b) criteria for determining those precious metal derivatives or derivatives linked to a precious metals index that do not generate incremental exposure for the portfolios of a pension fund other than a guaranteed bond pension fund pursuant to paragraph 3;
- (c) how to take into account netting and hedging arrangements pursuant to paragraph 4 when using the commitment approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index;
- (d) how to take into account the techniques and instruments mentioned in paragraph 5 when using the commitment approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index;
- (e) other details about using the commitment approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index.

Section 82e

Value-at-Risk approach

(1) Where a PFMC uses the VaR approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index, it shall apply this approach to all positions in the fund's portfolio.

(2) When using the VaR approach, PFMCs shall, pursuant to Section 55a(2)(d), set the maximum VaR in accordance with the defined risk profile of the pension fund other than a guaranteed bond pension fund.

(3) When using the VaR approach, PFMCs shall calculate the global exposure of the pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to precious metals index using either the relative VaR approach or the absolute VaR approach, whichever is appropriate for the fund's risk profile and investment policy. For the purposes of this Act, 'relative VaR' means the VaR of a pension fund other than a guaranteed bond pension fund divided by the VaR of a benchmark or reference portfolio. For the purposes of this Act, 'absolute VaR' means the VaR of the portfolio of a pension fund other than a guaranteed bond pension fund capped as a percentage of the fund's net asset value.

(4) PFMCs are required, at the request of Národná banka Slovenska, to demonstrate that the approach selected under paragraph 3 is appropriate for the given type of pension fund. The company's decision to use the respective approach, and the assumptions and grounds on which it based that decision, must be properly documented.

(5) The approach selected under paragraph 3 shall be used on an ongoing basis.

(6) Národná banka Slovenska may issue a decree, to be published in the Collection of Laws of the Slovak Republic, stipulating:

- (a) how to use the relative VaR approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives and derivatives linked to a precious metals index;
- (b) how to use the absolute VaR approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives and derivatives linked to a precious metals index;
- (c) quantitative and qualitative requirements for the VaR approach;
- (d) the maximum limit that may not be exceeded when using the absolute VaR approach;
- (e) other details about using the VaR approach to calculate the global exposure of a pension fund other than a guaranteed bond pension fund to precious metal derivatives or derivatives linked to a precious metals index.

Section 83

(1) If the transferable securities mentioned in Section 81(1)(a) have ceased to be traded on a regulated market, the PFMC shall, in compliance with professional conduct rules and prudential rules, sell them without undue delay and no later than 180 days after the trading in these transferable securities ceased. Národná banka Slovenska may at the request of the PFMC extend the period mentioned in the first sentence, on one or more occasions, provided that such extension is justified in the interest of consumers' protection.

(2) Unless otherwise provided by this Act, PFMCs may not sell, or otherwise dispose of, the securities mentioned in Section 81(1)(a) to (e) from the pension fund's portfolio under a contract stipulating delivery of the securities as a condition precedent for the payment of the purchase price.

(3) Unless otherwise provided by this Act, PFMCs may not buy, or otherwise acquire, the securities mentioned in Section 81(1)(a) to (e) for the pension fund's portfolio under a contract stipulating payment for the securities as a condition precedent for their delivery, nor may it provide an advance for the acquisition thereof.

Sections 83a to 83f - repealed

Section 84

(1) In selling or buying the securities mentioned in Section 81(1)(a) to (e) from or for a pension fund's portfolio, the PFMC shall sell or buy these securities for the best price obtainable in favour of the pension fund's portfolio.

(2) A pension fund's assets may not be used to provide loans, gifts, credits, or any security for the liabilities of other natural or legal persons. This is without prejudice to the provisions of Sections 81 and 82.

(3) Financial loans or credits may be received for a pension fund only if they are necessary to bridge temporarily a shortage of liquidity in the fund's assets and provided that such bridge is permitted by the rules of the fund and that the maturity is restricted to a period of up to one year from when the credit or loan is drawn.

(4) The total funds referred to in paragraph 3 may not exceed 5% of the net asset value of the pension fund as at date on which the loan or credit agreement is concluded.

(5) The following transactions may not be carried out to the credit or debit of a pension fund's assets:

- (a) securities lending; and
- (b) selling securities that are not a part of the pension fund's portfolio as at the date when the securities purchase agreement is concluded.

(1) The assets of a guaranteed bond pension fund may consist only of bond and financial investments and hedging transactions for foreign-exchange and interest-rate risk.

Section 88a - repealed

Section 88b

(1) The asset value of guaranteed bond pension funds shall be determined using the fair value method or amortised cost method. The asset value of pension funds other than guaranteed bond pension fund shall be determined using the fair value method.

(2) The amortised cost method may be used by PFMCs to determine the value of bonds, other debt securities, and money market instruments only if:

- (a) the securities have been issued or guaranteed by a sovereign, a national central bank, the European Union, the European Central Bank, the World Bank, the International Monetary Fund, the European Investment Bank, or the European Bank for Reconstruction and Development;
- (b) the credit assessment of the issuer or issuing programme at the time when the securities are acquired for the pension fund is not lower than the credit assessment of the Slovak Republic;
- (c) the currency in which the securities are denominated is the same as that in which the pension point is expressed;
- (d) the yield on the security is determined by a fixed amount, a fixed interest rate, a floating interest rate pegged to reference interest rates in a financial market, or the spread between the par value of the securities and the lower issue rate.

(3) PFMCs shall decide on which method they will use to determine the value of a financial instrument under paragraph 2 when they acquire the instrument for the pension fund, and this decision shall be binding on them and non-negotiable.

(4) PFMCs may not sell a financial instrument whose value has been determined by the amortised cost method, unless:

- (a) they sell the instrument not more than 30 days before the instrument's maturity date; or
- (b) they have identified an event or change in economic conditions that could lead to a significant reduction in the creditworthiness of the issuer or guarantor such that may prejudice the interests of savers.

(5) Where a PFMC sells a financial instrument in accordance with paragraph 4, it shall without delay inform Národná banka Slovenska of this fact and provide reliable evidence of the grounds on which the sale was based.

Section 89

(1) The limits and restrictions concerning a pension fund's assets laid down in Sections 82, 86 and 88 do not apply for the first 12 months after the establishment of the pension fund was commenced in accordance with Section 72(8).

(2) Once the period mentioned in paragraph 1 has expired, the PFMC may exceed the limits and restrictions under Sections 82, 86 and 88 only upon the exercise of pre-emptive subscription rights arising from securities or money market instruments included in the pension fund's assets, or as part of the merger of the pension fund.

(3) If any of the limits or restrictions mentioned in Sections 82, 86 and 88 are exceeded for reasons beyond the control of the PFMC, or owing to the exercise of pre-emptive rights under paragraph 2, the PFMC shall without undue delay notify Národná banka Slovenska of this fact and take immediate measures to conform with the limits and restrictions under Sections 82, 86 and 88, taking into account the interests of savers.

(4) Národná banka Slovenska may set a time limit for a PFMC to bring the composition of a pension fund's assets into compliance with the limits and restrictions under Sections 82, 86 and 88. This is without prejudice to the right of Národná banka Slovenska to sanction the PFMC for a breach of provisions under Sections 82, 86 and 88. The time limit mentioned in the first sentence may be extended by Národná banka Slovenska at the request of the PFMC, submitted no later than the last day of the period granted for making the composition of the assets compliant, and provided that such extension is justified in the interest of protecting savers.

(5) Transactions made in order to bring the composition of a pension fund's assets into compliance with the limits and restrictions mentioned in Sections 82, 86 and 88 shall take precedence over other transactions.

Section 90

Rules for the use of credit ratings

(1) For the purposes of this Act, PFMCs shall use, in addition to rules and procedures relating to the risk management of pension funds, the credit rating of the issuer or issuing programme in order to assess the risk associated with the investment of a pension fund's assets in bonds and other debt securities under Section 81(3)(c) which are:

- (a) issued by an entity that is subject to supervision under legal regulations of the Slovak Republic applicable to financial market participants;
- (b) issued by an entity that is subject to supervision under legally binding acts of the European Union applicable to financial market participants;
- (c) issued by another legal person incorporated in a Member State; or
- (d) guaranteed by a Member State.

(2) If the issue or issuing programme mentioned in paragraph 1 has not been assigned a credit rating, the PFMC shall use the credit rating of the issuer of the bond or other debt security, or the credit rating of the entity guaranteeing the bond or other debt security.

(3) For the purposes of this Act, PFMCs shall use, in addition to rules and procedures relating to the risk management of pension funds, the credit rating of the issuer in order to assess the risk associated with the investment of a pension fund's assets in:

- (a) money market instruments mentioned in Section 81(1)(e) points four, six and seven;
- (b) funds mentioned in Section 81(1)(f);
- (c) bonds and other debt securities mentioned in Section 81(3)(c), issued by an entity other than that referred to in paragraph 1.

(4) To assess the risk associated with the investment of a pension fund's assets, PFMCs shall use the credit rating issued by a credit rating agency included in the list maintained by Národná banka Slovenska under other legislation^{79b} and published in the Journal of Národná banka Slovenska.

(5) To assess the risk associated with the investment of a pension fund's assets, PFMCs shall use only solicited long-term international credit ratings. For sovereign or central credit ratings, PFMCs may also use unsolicited credit ratings.

(6) For the purposes of this Act, 'solicited rating' means a paid credit rating assessed and assigned at the request of, and with the cooperation of, the assessed entity.

(7) For the purposes of this Act, a credit rating assigned by a credit rating agency must be in the investment grade. The investment grade is the investment grade defined by the credit rating agency that assigned the relevant credit rating.

(8) For the purposes of this Act, 'issuer' means also a bank, or a foreign bank operating in the Slovak Republic via its local branch, whose registered office is in the Slovak Republic, in a Member State, or in a non-Member State, if such bank or foreign bank maintains a current account or deposit account for the pension fund of the PFMC.

(9) Where an issuer, issue, or issuing programme has been assigned a credit rating by more than one credit rating agency, the PFMC shall use the credit rating most recently assigned.

(10) PFMCs shall continually monitor for changes in credit ratings. If a credit rating agency downgrades to speculative grade the credit rating of a financial instrument in a pension fund's assets, or if it stops publishing such credit rating for any reason, the PFMC shall sell the financial instrument without undue delay, and no later than 180 days after becoming aware of this fact. Národná banka Slovenska may at the request of the PFMC extend the period mentioned in the previous sentence, on one or more occasions, provided that such extension is justified in the interests of consumers' protection.

Section 91 – repealed

Section 91a - repealed

TITLE THREE **Rules of the old-age pension scheme**

Section 92

(1) Unless paragraphs 2 and 3 provide otherwise, savers shall have in a guaranteed pension fund, as at the first day of the calendar month in which they attain

- (a) 52 years of age, at least 10% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (b) 53 years of age, at least 20% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (c) 54 years of age, at least 30% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (d) 55 years of age, at least 40% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (e) 56 years of age, at least 50% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (f) 57 years of age, at least 60% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (g) 58 years of age, at least 70% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (h) 59 years of age, at least 80% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (i) 60 years of age, at least 90% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions;
- (j) 61 years of age, 100% of the net value of their assets corresponding to the current value of their pension points credited from mandatory contributions.

(2) Where a saver notifies PFMC that they wish to reduce the minimum percentage ratio of the net value of their assets which is held in a guaranteed bond fund pursuant to paragraph 1, that ratio shall be reduced by half.

(3) In the case of savers who have concluded a scheduled pension payment agreement with a PFMC pursuant to Section 33a(3) and who, as at the effective date of this agreement, did not have in a guaranteed bond pension fund 100% of the amount stated on the certificate, the PFMC shall as at the date on which this agreement enters into force, but no later than thirty days after it was concluded, transfer to a guaranteed bond pension fund a share of the saver's assets corresponding to the amount stated on the certificate. If the saver does not have a personal pension account assigned to a guaranteed bond pension fund, the PFMC shall establish such account for the saver. For period during which scheduled pension payments are made pursuant to Section 33a(3), the saver may not switch to another pension fund.

(4) A saver may not simultaneously save in more than two pension funds managed by the competent PFMC. Where a saver saves in two pension funds, one of funds must be a guaranteed bond pension fund.

(5) The requirement laid down in paragraphs 1 and 2 that the value of a saver's assets in the old-age pension scheme must include a stipulated percentage ratio in a guaranteed bond pension fund is deemed to be met if this ratio is ensured as at the date of the switching referred to in Section 93(3); the ratio may not later be changed so as to reduce the ratio of assets in the guaranteed bond pension fund, except as the result of a change in the pension-point value following the date of the switching under Section 93(3) or on the basis of a notification under paragraph 2. This applies also when savers switch from one PFMC to another.

Section 93

(1) Savers may switch from one pension fund to another pension fund managed by the same PFMC on the basis of an amendment to the old-age pension scheme agreement. Where savers wish to switch a part of the net value of their assets to a guaranteed bond pension fund, the previous sentence applies *mutatis mutandis*.

(2) PFMCs shall accept a saver's application to a switch from one pension fund to another, provided that the application is not contrary to Section 92.

(3) If the percentage ratio of the net value of a saver's assets does not comply with Section 92(1) and (2), the competent PFMC shall within 30 day after the day on which the saver attains the age referred to in Section 92(1) and (2), transfer the minimum legally-stipulated proportion of the net value of the saver's assets to a guaranteed bond pension fund. If the saver does not have a personal pension account assigned to a guaranteed bond pension fund, the PFMC shall establish such an account for the saver.

TITLE FOUR

Personal pension accounts

Section 94

(1) PFMCs shall establish and maintain a personal pension account for each saver, in order to keep record of the number of pension points of the pension fund.

(2) PFMCs shall establish not more than two personal pension funds for each saver, where the saver has selected the ratio in which their pension savings are to be divided between pension funds. A saver may have two personal pension accounts provided that one of them is assigned to a guaranteed bond pension fund. The number of a pension fund's pension points in a saver's personal pension account shall be recorded by the PFMC separately from the personal pension accounts of other savers.

(3) A personal pension account shall include:

- (a) the number of the personal pension account and the date of its establishment;
- (b) the saver's name, date of birth, and permanent place of residence;
- (c) the name of the pension fund whose pension points are recorded in the account;
- (d) the number of pension points in the saver's personal pension account which are credited from mandatory contributions and the number of pension points in the saver's personal pension

- account which are credited from voluntary contributions;
- (e) information on all entries made in the personal pension account.

(4) Entries in a personal pension account which concern the crediting of pension points shall state:

- (a) the date when pension points were credited from mandatory contributions and the date when pension points were credited from voluntary contributions;
- (b) the number of pension points credited from mandatory contributions along with the period for which they were credited and the number of pension points credit from voluntary contributions;
- (c) the sum of the current values of all the credited pension points as at the date of crediting;
- (d) the current value of the pension point as at the date preceding the date on which the pension points were credited to the saver's personal pension account.

(5) PFMCs shall send each saver a statement of the saver's personal pension account as at the last day of the calendar year, but no later than one month after the end of the calendar year. The PFMC from which a saver is switching to another PFMC shall send the saver, no later than 15 days after the switching date, a statement of the saver's personal pension account as at the date which precedes the switch to the other PFMC. The PFMC to which the saver is switching shall send the saver, no later than 15 days after the switching date, a statement of the saver's personal pension account showing the current value of the personal pension account as at the switching date. PFMCs shall not charge savers for the production and sending of such statements. The provisions of the second to fourth sentences apply, mutatis mutandis, where the saver has concluded a scheduled pension payment agreement with a PFMC other than the one with which they were a saver.

(6) Statements of a saver's personal pension account shall be sent by the PFMCs in paper form to the saver's last known permanent address, unless it is agreed with the saver to send such statement to another address or in another way. Statements of savers' personal pension accounts shall be truthful, easy to understand, and free of specialist terminology, and they shall not be misleading.

(7) The content and structure of statements of savers' personal pension accounts shall be stipulated by the Ministry in a decree, in agreement with Národná banka Slovenska; the full text of such decree shall be published in the Collection of Laws of the Slovak Republic.

(8) Where so requested by a saver, a PFMC shall without undue delay, once a year, provide the saver with an explanation of the statement of the saver's personal pension account.

(9) With the agreement of the saver and the PFMC, the statement of a personal pension account may contain information other than that mentioned in the decree referred to in paragraph 7.

(10) Within 15 working days after receiving a saver's written request for a current statement of their personal pension account, the PFMC shall send such statement to the saver.

(11) The costs related to modifying the statement of a personal pension account under paragraph 9, or to sending the statement of a personal pension account more frequently than

specified in paragraph 5 shall be met by the saver.

(12) Along with the statement mentioned in paragraph 5, PFMCs shall send savers written notification that:

- (a) the saver may be sent, on request and at no charge, written information about pensions;
- (b) the saver may at no charge be provided with written information about pensions at the premises of the PFMC or of the Social Insurance Agency;
- (c) information about pensions is published on the website of the company and the website of the Social Insurance Agency;
- (d) the saver may, on the basis of a notification pursuant to Section 92(2), reduce the minimum percentage ratio of the net value of the saver's assets which is held in a guaranteed bond fund.

(13) The information about pensions referred to in paragraph 12(a) to (c) shall be drawn up by the PFMC and the Social Insurance Agency.

(14) The information about pensions referred to in paragraph 12(a) to (c) shall be truthful, easy to understand, and free of specialist terminology. A template for this information shall be laid down by the Ministry in a decree, in agreement with Národná banka Slovenska; the full text of such decree shall be published in the Collection of Laws of the Slovak Republic.

(15) If in the case of savers who are being paid an old-age pension or temporary old-age pension through scheduled payments pursuant to Section 33a(2) or (4) and whose assets are partly held in a pension fund other than a guaranteed bond pension fund, it happens that the net asset value of their assets falls for the first time below 10% of the net value of the assets from which the scheduled pension payments started to be made, the PFMC shall notify the saver in writing, within ten days after the day on which the saver's assets fell below that ratio, that unless the saver requests the transfer of their assets from the other pension fund to the guaranteed bond pension fund, the scheduled pension payments to the saver shall cease forthwith; the net value of the saver's assets in the fund from which the scheduled pension payments are being made will be zero and the saver's remaining assets will be paid to the saver only after the saver requests the transfer of these assets to the guaranteed bond pension fund and the subsequent disbursement of these assets through scheduled payments. PFMCs shall not be obliged to provide written notification pursuant to the previous sentence if the payment period for the temporary old-age pension through scheduled payments is shorter than three months.

Section 95

(1) On the working day following the day on which a payment of contributions or penalty payments credited to the depository-maintained unassigned payments account of a PFMC is identified, the PFMC shall credit to the saver's personal pension account such number of pension points of the respective pension fund that corresponds to the ratio between the value of the identified payment and the current pension-point value of the pension fund as at the first working day preceding the payment identification date, and it shall without undue delay credit the corresponding amount from the unassigned payments account to the current account of the pension fund. The payment identification date is deemed to be the first working day on which all the mandatory elements of this payment became known to PFMC. In crediting the amount, the PFMC shall adhere to the selected or mandatory ratio in which savings are divided between pension funds.

If the amount cannot be divided without leaving a residual, it shall be divided in such a way that the amount to be credited to the current account of a guaranteed bond fund is rounded up to the nearest euro cent and the amount to be credited to the current account of a pension fund other than a guaranteed bond fund is rounded down to the nearest euro cent.

(2) Where the Social Insurance Agency has requested a PFMC to return mandatory contributions and penalty payments in accordance with Section 28a(2), the PFMC shall, on the transfer date referred to in Section 28a(4), deduct from the saver's personal pension account such number of pension points that corresponds to the ratio between the amount mentioned in Section 28a(4) first sentence or second sentence and the current pension-point value as at the date preceding the transfer date, and in accordance with the current ratio of savings between pension funds; the company shall without delay credit this amount from current account of the pension fund to the account of the Social Insurance Agency at the State Treasury. Where a personal pension account is cancelled, the PFMC shall deduct all pension points from the account prior to its cancellation; this provision applies, mutatis mutandis, to the transfer of amounts under Section 64a(9), (10) and (12) or Section 65(4) to the Social Insurance Agency.

(3) If the elements of a contribution payment credited to a pension fund's current account held with the depository do not unambiguously identify the saver to whom the payment pertains, the pension fund's pension points related to this payment may be credited to the saver's personal pension account only after unambiguous designation of the payment as at the date when the saver to whom the payment pertains is identified. The number of pension points credited to the personal pension account as at the date when the saver to whom the payment pertains is identified shall be calculated by procedure specified in paragraph 1.

Section 96

(1) On the day when a saver switches from one pension fund to another pension fund managed by the same PFMC or on the day of a change in the ratio in which a saver's pension savings are divided between pension funds managed by the same PFMC, the PFMC shall amend the record of entries in the saver's personal pension account which relate to the pension funds concerned. For this purpose, each pension fund in which the saver was originally saving shall be called the 'transferor pension fund' and each pension fund to which the saver is switching or to which an amount corresponding to the current value of the saver's pension account, or part thereof, is to be transferred shall be called the 'transferee pension fund'.

(2) Within three working days after the day when a saver switches from one pension fund to another managed by the same PFMC (the 'switching date') or the day of a change in the ratio in which a saver's pension savings are divided between pension funds managed by the same PFMC (the 'savings ratio change date'), the PFMC shall transfer the respective part or entirety of the amount corresponding to the current value of the saver's pension account as at the switching date or savings ratio change date to the current account of the transferee pension fund. If the switching date or savings ratio change date falls on a Saturday or non-working day, the switching date or savings ratio change date is deemed to be the next working day.

(3) On the switching date or savings ratio change date, the PFMC shall deduct from the saver's personal pension account either all or the respective part of the pension points of the

transferor pension fund and credit that account with such number of pension points of the transferee pension fund which corresponds to the quotient of the amount transferred and the current pension-point value of the transferee pension fund as at the day preceding the switching date.

(4) In following the procedure under paragraphs 1 to 3, PFMCs shall adhere to the selected or mandatory ratio in which savings are divided between pension funds.

Section 97

(1) On the date when a saver switches from one PFMC to another PFMC, the PFMC from which the saver is switching shall cancel all of the saver's personal pension accounts. As of the switching date pursuant to Section 64b(5), the saver shall become a saver with the PFMC to which the saver is switching.

(2) The PFMC from which a saver is switching shall, within three working days after the saver's switching date, transfer an amount equal to the current value of the saver's personal pension account, as at the switching date, from the current account(s) of the pension fund(s) to the unassigned payments account of the PFMC to which the saver is switching; the company shall also state which part of that amount is equal to the current pension-point value credited from voluntary contributions. If the saver's switching date falls on a Saturday or non-working day, the switching date is deemed to be the next working day.

(3) Prior to cancelling a saver's personal pension account in accordance with paragraph 1, the PFMC from which the saver is switching shall deduct all pension points from the saver's personal pension account. The PFMC to which the saver is switching shall proceed as appropriate in accordance with Section 95(1).

(4) The PFMC to which a saver is switching shall credit pension points to the saver's one or two personal pension accounts in accordance with Section 95(1).

Section 98

The pension points recorded in a saver's personal pension account may not be used other than in the way laid down by this Act.

(4) The depository of a pension fund may, on the basis of a contract, outsource the safe custody of foreign securities to another person that is authorised to perform the outsourced activities. A depository may not outsource such activities to a person whose interests may conflict with those of savers. A depository which holds foreign securities in safe custody, or the person to whom it has outsourced this activity, shall always keep these securities separate from other assets and in a way that ensures the protection of savers’ rights in accordance with Section 74.

(3) A depository contract shall be concluded for an indefinite period. The contracting parties to a depository contract may terminate it. The minimum period of notice shall be three months unless a shorter period of notice is stipulated in the depository contract. (4) In the event of the revocation or expiry of a depository’s banking licence,⁸³ or its licence to provide investment services⁸⁴ in respect of the part required for depository activities, or where a depository has been placed in receivership, then as at the effective date of the respective decision,^{84a} the depository’s licence to perform depository activities as defined in this Act shall expire and the depository contract concluded with this depository shall cease to be valid.

(5) The termination of a depository contract or the occurrence of a situation mentioned in paragraph 4 shall without undue delay be notified by the depository to Národná banka Slovenska and to the PFMC with which the depository contract was concluded.

(6) After a depository contract has ceased to be valid, the PFMC shall without undue delay suspend the use of the pension funds' assets, except for the payment of liabilities incurred before the expiry of the depository contract and operations necessary for securing the pension funds' assets against damage, until a contract is concluded with a new depository.

(7) No later than the last day of the notice period of a depository contract or one month after a depository contract became invalid in a way mentioned in paragraph 4, the PFMC shall prepare a draft depository contract with another depository and shall request Národná banka Slovenska to grant prior approval in writing for the change of depository.

(8) If within the period mentioned in paragraph 7, a PFMC has not requested Národná banka Slovenska to grant prior approval in writing for a change of depository, Národná banka Slovenska shall appoint the new depository within one month after this period has elapsed. A PFMC and its depository appointed by Národná banka Slovenska shall without undue delay conclude a depository contract. After this depository contract has been concluded, the PFMC shall without undue delay submit it to Národná banka Slovenska.

(9) A depository that has ceased to perform its activities for the pension funds of the managing PFMC shall without undue delay hand over the pension funds' assets and all related documentation and information to the new depository. Until the handover of the assets and related documentation, the depository must not use or allow the use of the pension funds' assets, except for operations required to secure the pension funds' assets against damage or to ensure the payment of old-age pension and temporary old-age pension through scheduled payments.

(10) A depository shall continue to fulfil its obligations arising from the depository contract in the event that the PFMC has gone into bankruptcy, and shall do so until a depository contract is concluded with the PFMC to which the management of the pension funds has been transferred.

Section 101

(1) Depositories shall maintain a current account⁸⁵ in a stipulated currency for the PFMC with which they have concluded a depository contract. Depositories shall maintain one current account⁸⁵ in a stipulated currency for each pension fund of the managing PFMC with which they have concluded a depository contract. Depositories shall maintain one unassigned payments account for each PFMC with which they have concluded a depository contract.

(2) All payments, redemptions, or transfers of funds included in a pension fund's assets shall be carried out through the pension fund's current account mentioned in paragraph 1.

(3) PFMCs may not open current account in a bank, or a foreign bank operating in the Slovak Republic via its local branch, which is not their depository. Národná banka Slovenska may also suspend from exercising such rights any person whose actions in regard to the PFMC are detrimental to the proper and prudential conduct of the business of the company.

(2) From its issuer's register and list of shareholders, a PFMC shall submit to Národná banka Slovenska an extract produced on a relevant date⁹⁷ that is no later than five working days before the date of its general meeting. The PFMC shall submit this extract to Národná banka Slovenska

(2) The principle purpose of receivership shall be:

(11) For conducting receivership, a receiver shall be entitled to remuneration proportional to the period of receivership and provided under the same conditions as were attached to the agreed fee of the PFMC for the management of the pension fund.

(12) Receivership shall terminate upon the date stipulated in the decision of Národná banka Slovenska to place the pension fund in receivership or in the decision of Národná banka Slovenska to terminate the receivership.

(13) Národná banka Slovenska shall without undue delay appoint a new receiver where:

(15) A receiver that is changed for a reason mentioned in paragraph 13(b) or (c) is required to fulfil the obligations of the receiver until the effective date of the decision of Národná banka Slovenska on the appointment of a new receiver.

(16) The provisions of paragraph 5 apply to the appointment of a new receiver under paragraph 13.
