Source: NBS, Monthly report on the full sector classification of loans (V (NBS) 33-12); data include only loans provided to household sector (S.143, S144, S145); only data for banks that grant retail loans are included.

Since the January 1, 2012 two methodological changes have influenced these data (both without any significant impact on the reported data):

a) Data include loans denominated in any currency, not just loans denominated in euro, as it was before December 31, 2011. Due to this change, the volume of total loans granted to households increased by 0.01%.

b) Since January 1, 2012 data are reported at outstanding principal amounts (excluding interests). Until December 31, 2011 the data were reported at a value which included unpaid accrued interests and other facilities in addition to the outstanding principal amount.

The table includes only special-purpose loans secured by real estate (housing loans consisting of mortgage loans, other housing loans and loans provided by building societies), data on any purpose loans secured by real estate is not available.
